The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office Action is in response to the filing of the application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Nobori et al. (U.S. Patent 5,616,024).

Nobori discloses a ceramic heater (Figs. 25c and 26) that contains a ceramic substrate (72) having a conductor layer (86) formed inside thereof where in a notch (86a) is formed, a guard electrode or can function as a resistance heating element (70), an electrostatic electrode (82) formed inside thereof and functions as an electrostatic chuck.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/619,567

Art Unit: 2822

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nobori in view of McMillin et al. (U.S. Patent 5,835,334).

Nobori discloses all the limitations except for a chuck top conductor layer. Whereas McMillin discloses a temperature chuck (Fig. 4) that contains a chuck top conductor layer (1) and a resistance heating element (18) formed on the surface to function as a hot plate. The chuck top conductor layer is formed to insulate the ESC from the processing chamber. (Column 4, lines 15-19) Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the ceramic heater of Nobori by incorporating a chuck top conductor layer to insulate the ESC from the processing chamber as taught by McMillin.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiesha L. Rose whose telephone number is 571-272-1844. The examiner can normally be reached on M-F 8:30-6:00 off 2nd Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
